SAGE GROWING EQUALITY

About SAGE

SAGE (Systemic Action for Gender Equality) is a Horizon 2020-funded project designed to address persistent gender inequalities in higher education and research institutions.

The diverse consortium of 7 universities provides the testing ground for institutional change through the implementation of self-tailored Gender Equality Plans (GEPs).

SAGE Model for Gender Equality Plans

SAGE will produce an innovative model and diagnostic toolkit focused on four key areas for action.

SAGE Goals

The ultimate objective of the three-year project is to improve decision-making and enhance research capacity and quality by:

- Incorporating gender-sensitive practices, processes and procedures in research, and;
- Developing balanced representation of women and men in institutional decision-making.
